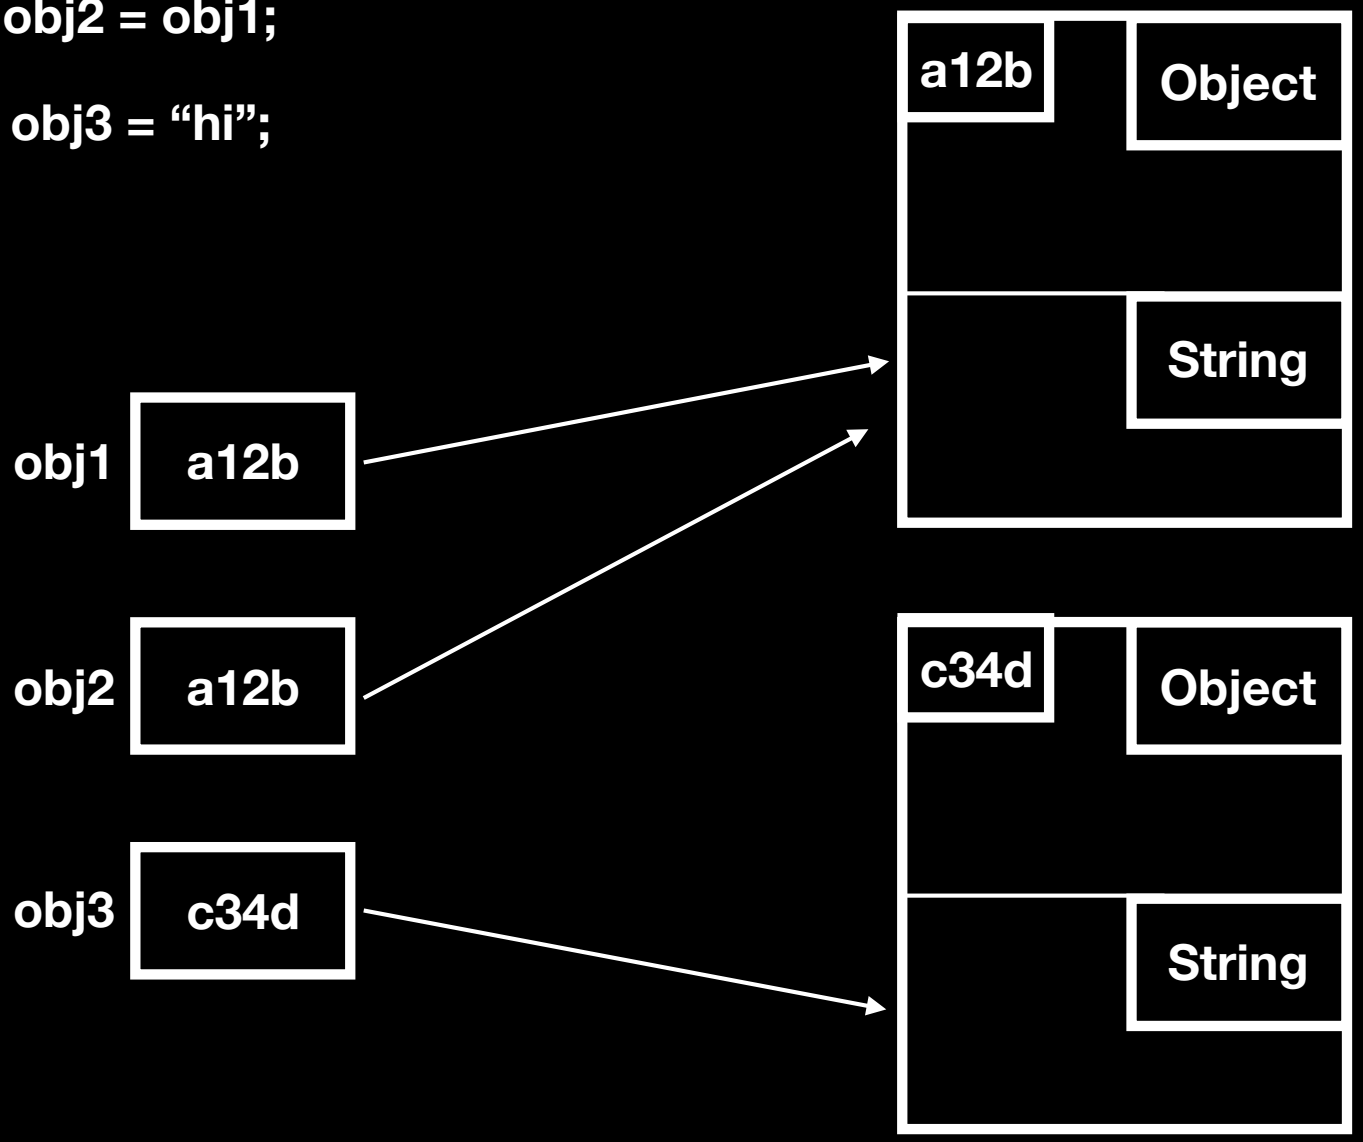
Reference Types

```
String obj1 = “hello”;

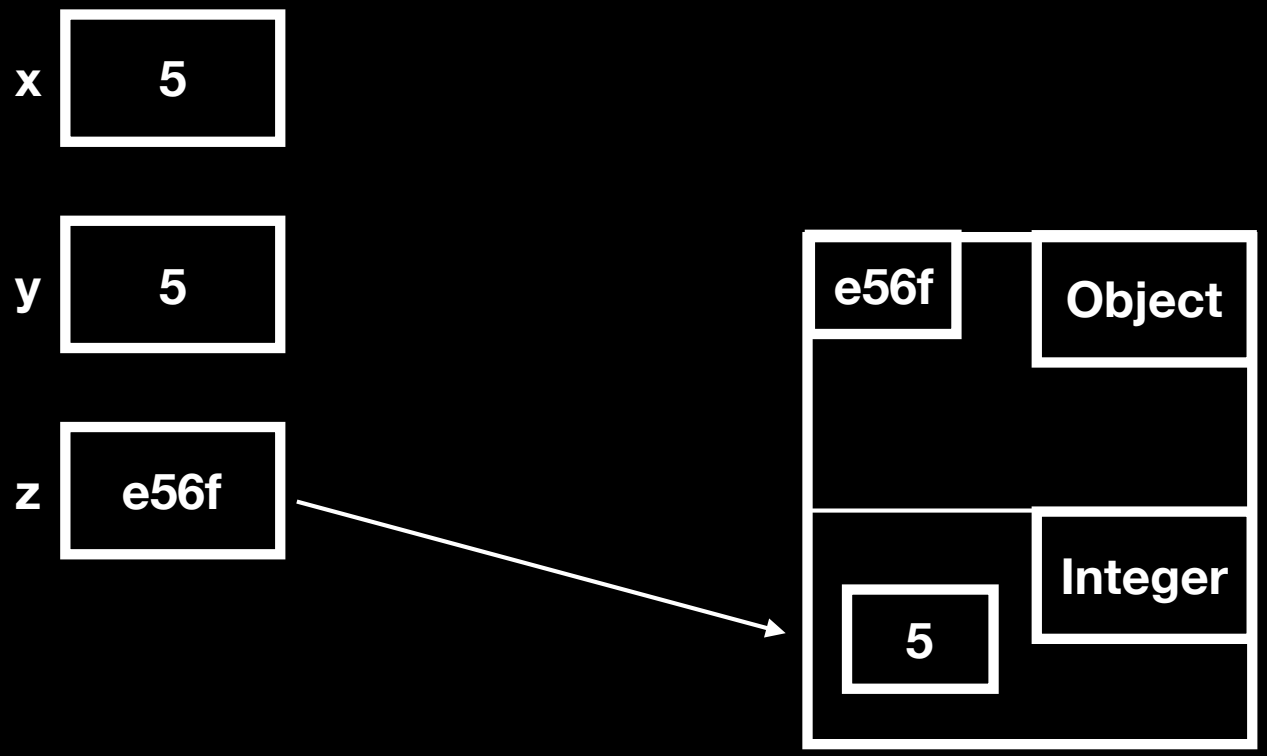
String obj2 = obj1;

String obj3 = “hi”;
```



Primitive Types

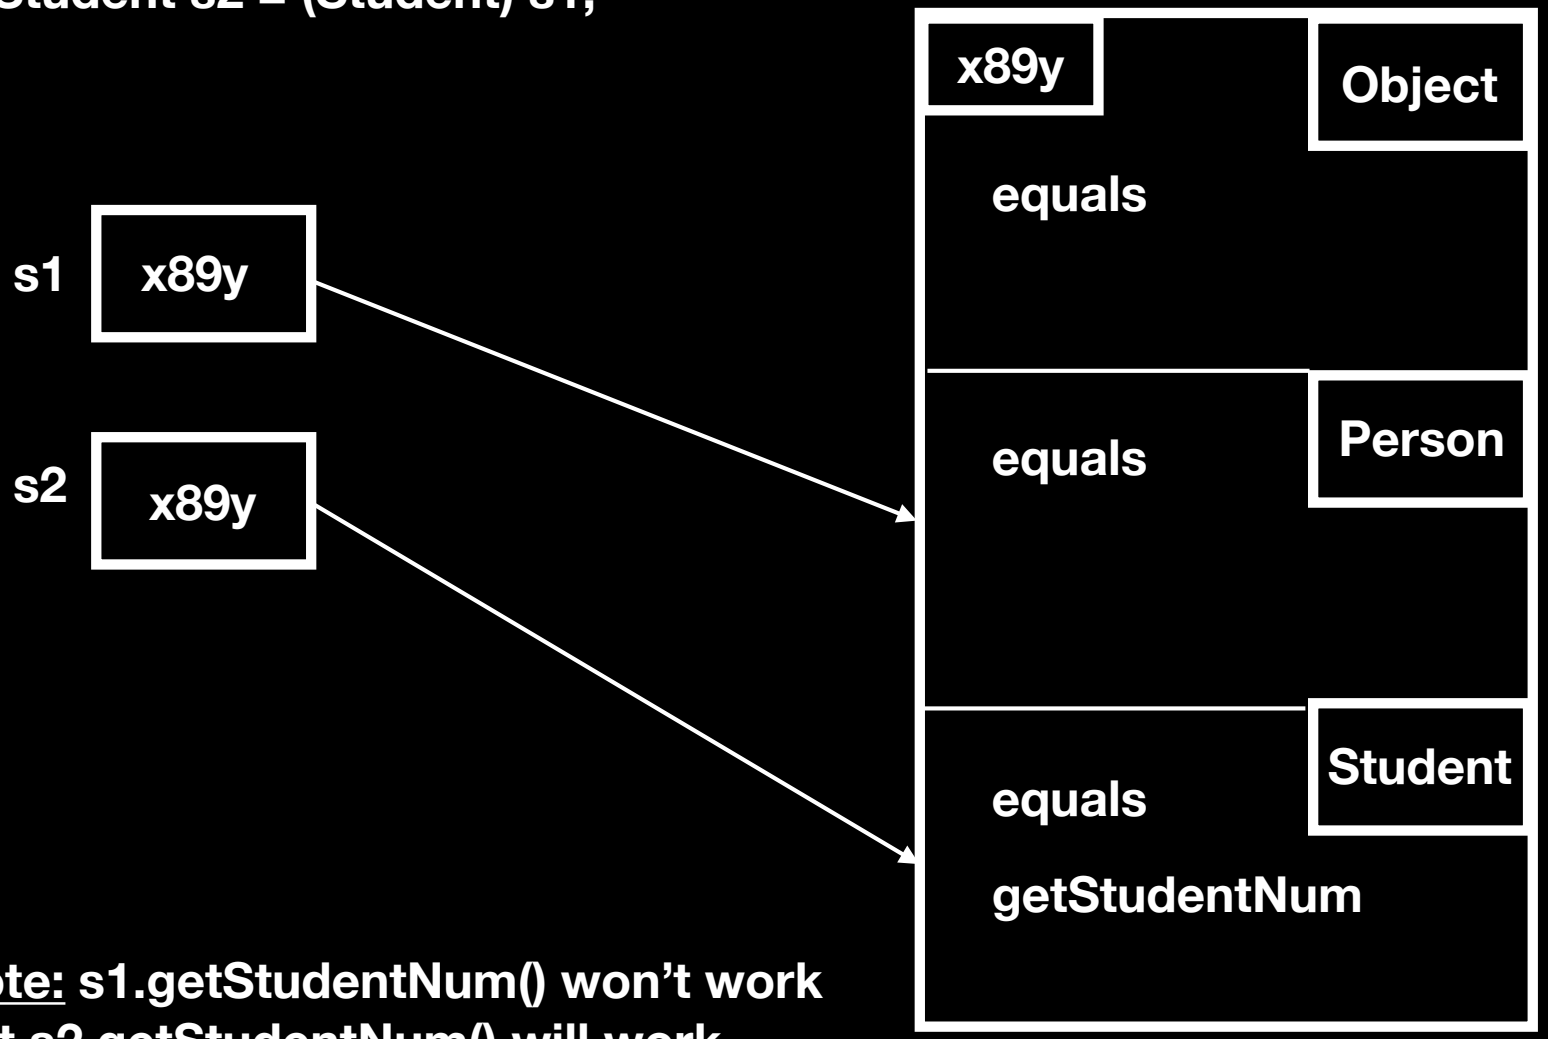
```
int x = 5;
int y = x;
Integer z = new Integer(5);
```



Casting

```
Person s1 = new Student("A B");

Student s2 = (Student) s1;
```



Note: s1.getStudentNum() won't work but s2.getStudentNum() will work.
